

# Title: Women's fates in Central Europe

**Pedagogical goals:** to develop comprehension, digital competence, verbal communication and social skills

**Period:** 4 x 45 minutes

**Age group:** 7-12th classes

**Group size:** 21-35 members

**Tools:** laptops/tablets/telephone and Internet access: *HerStories* website

## Description of the project:

Using the women's stories located on <https://www.her-stories.eu/hu> website we have planned an interdisciplinary project that is suitable for remembering holocaust.

1st class: History

According to the age group, recalling prior knowledge related to the history of Jews in the 19-20th centuries and its addition, by which the goal is to create the context.

2nd class: Literature

Each of the 7 randomly generated groups gets a woman's story. Their task is to collect the turning points of her life, choose 6 events that they think as typical or special and select a photo. They present their work to each others in the 2nd half of the class.

3rd class: Digital Culture

Each group prepares an assignment with the help of Genially. There will be 6 statements about all women and a photo with the years on the following slide.

4th class: Teacher's Lesson

We organize a competition: which group can guess who the quotes are about using the least amount of information.

We print out the 7 women's photos and place them on the bulletin board, by which our goal is to let the stories work in the students.
